

Fectar: The Future of Immersive Learning & Training

Uniting the World through Immersive VR, AR & AI

Fectar is revolutionizing education and corporate training with a powerful, device-independent XR (Extended Reality) platform. Our AI-enhanced, no-code solution enables seamless immersive learning experiences for billions of users worldwide.

The Problem

- The digital-native generation demands engaging and interactive learning.
- Shortages of technical staff due to declining interest in technical education.
- Fragmented XR solutions are costly, device-dependent, and difficult to scale.

Market Opportunity

- Global XR in Education Market: **\$45B by 2030 (CAGR 20%)**
- Business Training & Education TAM: **\$21B**

The Fectar Solution

Access for All

Fectar app supports 2.4 billion smartphones, VR headsets, and desktops.

Creation by All

Fectar Studio offers no-code, low-code, and full-code content creation.

Meet with Everyone

Fectar MeetUp enables real-time XR collaboration across devices.

Why Fectar?

Multi-Device Support – Works on smartphones, VR, AR, tablets, and desktops.

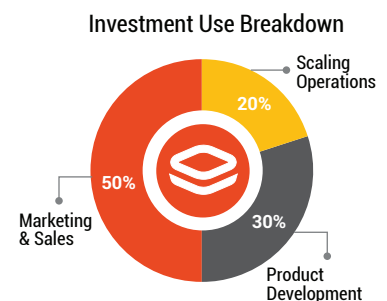

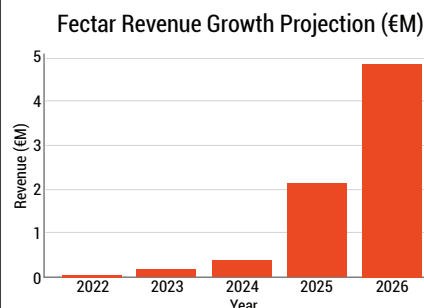

AI-Powered Virtual Teachers – Personalized, interactive education.

Proven Growth – Over 7 million downloads, adopted by schools, universities, and business.

Scalable SaaS Model – Recurring revenue with high margins (95% education, 60% business).

Investment Opportunity

- Seeking €1 million from investors with a SaaS background with a minimum ticket size of €250K to accelerate growth.
- 120x revenue growth projected by 2026.
- Pathway to profitability by 2026.
- Existing investor pledged €1M, securing 50% of the current round.
